HEALTH PROGRAM FOR GOATS

Group	VACCINE, DEWORMER & SUPPLEMENTS		TIME/AGE OF ADMINISTRATION	RECOMMENDED PRODUCT
	ESSENTIAL	OPTIONAL		
Kids (Lambs)		Heartwater	0-3 wks	Infective blood vaccine
	Pasteurellosis/Clostridial combination		1-3mo. Boost 4wks later	Ovi-clos P
		Multi-clostridial vaccine	1-3mo. Boost 4wks later	Deca-Sure*
		Rift Valley Fever	After weaning, before 1st breeding	Live or Inactivated vaccine
		Corynebacterium pseudotu-berculosis (CLA)	1-3mo. Boost 4wks later	Inactivated vaccine
		Anthrax (see comment below)	3-4mo. Boost 4wks later	Trio-Sure OR Botu-Sure+Anthrax*
		Botulism		
	Liver fluke &/or Conical Fluke (depending on area)		3-6mo	Various-refer to catalogue
	Roundworms & Tapeworms		2 & 3mo	Endo + Lint
		Trace mineral supplement	Weaning	Complex + A & E for Sheep and Goats
Ewes	Pasteurellosis/Clostridial combination		Annually before lambing (4-6wks). High risk areas use bi-annual	Ovi-clos P
	Enzootic abortion (Clamydiosis)		Before breeding (4-6wks). Annually	Live or Inactivated vaccine
		Multi-clostridial vaccine	Before lambing (4-6wks)	Deca-Sure*
		Rift Valley Fever	Before breeding (4wks)	Live or Inactivated vaccine
		Corynebacterium pseudotu-berculosis (CLA)	Every 6-12mo. Before shearing	Inactivated vaccine
		Anthrax (see comment below)	Annually	Trio-Sure OR Botu-Sure+Anthrax*
		Botulism		
		E.coli, Rota & Coronavirus	Before lambing (4-8wks)	Inactivated vaccine (Extra-label) / Autogenous vaccine.
	Roundworms		Before breeding (3-4wks), before lambing (4-6wks). Use FAMACHA ® system	Various-refer to catalogue
	Liver fluke &/or Conical Fluke (depending on area)			Various-refer to catalogue
	Trace mineral supplement		4-6wks before breeding & lambing	Complex + A & E for Sheep and Goats

Botu-sure: Reg. No. G4258 Act 36/1947, NSO V18/24.4/1436 Act 13/2003. Complex A&E Sheep & Goats: Reg. No. G4119 Act 36/1947, NSO V17/19.2/1388 Act 13/2003. Deca-sure: Reg. No. G4280 Act 36/1947, NSO V19/24.4.2/1443 Act 13/2003. Endo+Lint: Reg. No. G3570 Act 36/1947. NSO V05/18.1.8/289 Act 13/2003. Ovi Clos P: Reg. No. G4261 Act 36/1947, NSO V18/24.4.2/1435 Act 13/2003. Trio-sure: Reg. No. G4242 Act 36/1947, NSO V18/24.4/1439 Act 13/2003.

HEALTH PROGRAM FOR GOATS

Group	VACCINE, DEWORMER & SUPPLEMENTS		TIME/AGE OF ADMINISTRATION	RECOMMENDED PRODUCT
	ESSENTIAL	OPTIONAL		
Bucks (Rams)	Pasteurellosis/Clostridial combination		Annually before winter. High risk areas use bi-annual	Ovi-clos P
		Multi-clostridial vaccine	Annually before high risk period e.g. Spring	Deca-Sure*
		Rift Valley Fever	After breeding (4wks) / In Spring	Live or Inactivated vaccine
		Corynebacterium pseudotu-berculosis (CLA)	Every 6-12mo. Before shearing	Inactivated vaccine
		Anthrax (see comment below)	Annually	Trio-Sure OR Botu-Sure + Anthrax*
		Botulism		
	Roundworms		Before breeding (3-4wks). Use FAMACHA ® system	Various-refer to catalogue
	Liver fluke &/or Conical Fluke (depending on area)			Various-refer to catalogue
	Trace mineral supplement		4wks before breeding	Complex + A & E for Sheep and Goats

The above program is only a guideline. Speak to a / your veterinarian for more information.

Liver & Conical fluke treatment is based on the season. Autumn (Apr-May), Spring (Aug-Sep) & Mid summer (Jan-Feb) treatments are the most effective.

Roundworm treatment: The FAMACHA ® system is very helpful to determine when to deworm animals.

Anthrax: DO NOT vaccinate goats routinely as they can have severe adverse reactions to any anthrax vaccine. Only do when required by law or in case of an outbreak.

Deca-Sure is not registered for goats but is used successfully in this species (Note this is an extra-label practice).

Botu-sure: Reg. No. G4258 Act 36/1947, NSO V18/24.4/1436 Act 13/2003. Complex A&E Sheep & Goats: Reg. No. G4119 Act 36/1947, NSO V17/19.2/1388 Act 13/2003.
Deca-sure: Reg. No. G4280 Act 36/1947, NSO V19/24.4.2/1443 Act 13/2003. Ovi Clos P: Reg. No. G4261 Act 36/1947, NSO V18/24.4.2/1435 Act 13/2003.
Trio-sure: Reg. No. G4242 Act 36/1947, NSO V18/24.4/1439 Act 13/2003.
